

Take control with ReCalc MoniTOr and save money and resources on your building's energy consumption

Energy Management Software that actually works

Take control with ReCalc MoniTOr and save money and resources on your building's energy consumption. Now you can monitor power cables, water pipes and heating pipes from a user friendly EMS platform, designed to create valuable results for you and your business.

For professionals - who operates professional buildings

ReCalc MoniTOr is targeted municipalities, companies, building owners and building managers that need a complete energy management tool - easy and straightforward.

One coherent solution - From sensor to report

With ReMoni's patented IoT-sensors - hardware and cloud-software matches from the beginning. You have complete control over the entire data chain - from data collection on the cable or pipe to ReCalc MoniTOr. You get the only coherent solution on the market!

Simple clear overview is key

There are plenty of unmanageable systems and complicated spreadsheets. That's why ReCalc MoniTOr is based on "Best practice". Beneath the surface algorithms and Machine Learning are working for you, the only thing you have to focus on is intuitive dashboards that are easy to read and easy to act upon.

One coherent overview demands **best practice dashboards**. It has never been easier to gain visual insight in your energy consumption

- Quick and easy to use, with intuitive layout.
- Best practice. Dashboards based on comprehensive business knowledge. Getting the full picture has never been easier!
- Customized dashboards. Users can have their own individual set of dashboards.
- Alarms. Receive alarms and notifications via e-mail when a unit stops working or act suspiciously.
- Always available data. Online 24/7. Just log in.
- Best price/performance on the market.
- Secure. After all, it's your data. Cooperate with your co-workers in a safe, shared environment.

"ReCalc MoniTor visualizes the alarms in an easy and manageable way - the customized dashboards creates an overview with endless possibilities for use of the data. For example reports, data analysis and graphic overview over consumption."

- Bo Eskerod Madsen, CEO.

It's all about saving resources

ReMoni is an award-winning company within energy optimizing. We develop, design and manufactures in Denmark.
