

High precision Power Meter with 15 channels. Real time data visualized in online, live dashboards and reports. Easy installation. Cost effective solution.

With its 15 channels and wireless connectivity, PowerMoniMain provides high-accuracy real-time power measurements for mains power monitoring, sub-metering and for metering of large devices, e.g. CNC-machinery and production lines.

PowerMoniMain combines sensor, data-logger and wireless connection in one coherent solution.

By increasing the lifespan and durability of key machinery and reducing energy waste in commercial buildings, our IoT solution is the way forward to maximizing operational profit.

Acting on facts have never been easier.

Can be used both for Metering and Energy Efficiency in buildings and production facilities.

PowerMoniMain is the perfect solution for data-hungry energy- and facility managers.

PowerMoniMain delivers 5 multiple phase or 15 single phase metering units. For each unit, the advanced Cloud AI performs continuous surveillances for abnormal operations.

Plus, the AI gives you predictive- and proactive maintenance capabilities.

ReMoni is all about saving resources!

ReMoni is an award-winning Danish company that develops, designs and manufacturers innovative solutions for resource and energy optimization.

With patented clamp-on IoT technology, combined with machine learning and algorithms, ReMoni helps companies, building- and energy managers saving money and resources – in an easy, reliable and affordable way.

Switch board already fully occupied? No problem!

PowerMoniMain comes in a space saving industry grade IP-66 box, ready to be installed outside the switchboard – delivering maximum installation opportunities.

Instant screening? No problem!

PowerMoniMain can be used as a temporary power meter helping you screening irregularities in your setup. Problems like un-balanced or peak consumption can be identified. Overnight, you have granular data records of e.g. standby consumption or unexpected waste consumption.

PowerMoniMain has a fantastic ROI.

The versatility is great, no matter whether you are an electrician, a Facility Manager or an Energy Adviser – PowerMoniMain is the right tool for you!
